

## **YOUR DEDICATED TEAM**

---

***Receptionist, administrative personnel, NCOIC and volunteers:*** courteously and professionally optimize your clinic experience (before, during and after)

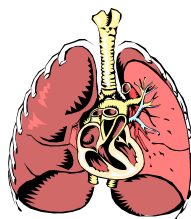

***Clinic nurse:*** thoughtfully provides asthma teaching, other education, medications and delivers and coordinates patient care.

***Respiratory Clinician:*** swiftly assesses and fulfills your oxygen, nebulizer, CPAP machine (for sleep apnea) and other equipment needs.

***Pulmonary function technologists:*** accurately measures your lung capacity --including response to medications-- and perform detailed exercise tests.

***Pulmonary physicians:*** expertly diagnose and treat your lung problems, perform procedures such as bronchoscopy, thoracentesis, and chest drainage tubes. They also provide full time care for patients in our intensive care units (ICU) as well as teach medical students, residents and fellows.

***We want to be  
excellent partners in  
your health!***
